Real world demonstration of self management as part of high quality diabetes care in primary care and community settings

Advancing Diabetes Self Management

Building Community Supports for Diabetes Care
Resources & Supports for Self Management

- Individualized Assessment
- Collaborative Goal Setting
- Instruction in Skills
- Ongoing Follow Up and Support
- Community Resources
- Continuity of Quality Clinical Care
Importance of Ongoing Follow Up and Support

• Review of programs to enhance diabetes self management (Norris et al., *Diabetes Care* 2001 24: 561-587.):
  – “Interventions with regular reinforcement are more effective than one-time or short-term education”

• Review of effects of self management on metabolic control (Glycosolated hemoglobin) (Norris et al., *Diabetes Care* 2002 25: 1159-1171.)
  – Only predictor of success: *Length of time over which contact was maintained*
Not just in diabetes – Duration and Variety of Smoking Cessation Interventions

• Meta-analysis of Kottke et al. (*JAMA* 1988 259: 2882-2889) “Success was **not associated with novel or unusual interventions**. It was the product of personalized smoking cessation advice and assistance, **repeated in different forms** by **several sources** over the **longest feasible period**.”

• AHRQ meta-analysis: Greater likelihood of smoking cessation with greater length of intervention (Fiore et al. *Treating tobacco use and dependence*. USDHHS, 2000).
Resources & Supports for Self Management

- Individualized Assessment
- Collaborative Goal Setting
- Instruction in Skills

**Ongoing Follow Up and Support**

- Community Resources
- Continuity of Quality Clinical Care
Key Features of Ongoing Follow Up and Support
Not Time Limited

• What’s wrong with this picture?
  – 8 Sessions Health Coach if GHb > 8
  – If GHb falls to 7, Health Coach terminated

• “OK, You’ve got type 1 diabetes. We’ll put you on insulin for two weeks and see if that cures you.”

• That ongoing support needs to be ongoing does not mean it’s ineffective.

• No more than that insulin needs to be ongoing
Personal connection is critical

• Based in an ongoing relationship with a provider
• Not necessarily physician
• Critical are:
  – Time to get to know individual
  – Links to rest of team
• Community Health Workers
**On-Demand**

- Available on demand and as needed by the recipient
- Community based events, e.g., health fairs
- Weekly breakfast clubs
- Monthly diabetes breakfast
- Yearly party to which family invited
- *Talking Circles* in American Indian communities
- Group Medical Visits with additional activities
Proactive or Staff Initiated

- Diabetes is progressive and management is influenced by life changes
- Keep individuals from “falling between the cracks”
- Refer to other components of Resources and Supports for Self-Management
- Contact initiated by provider every 2 to 4 months
- Holyoke: database triggers contact by RN/CHW team
- Low demand – communicate interest rather than surveillance
- Also, newsletters, mailings, etc.
Motivational

- Especially for those with long Hx, motivation may be more critical than skill.
- Nondirective Support – accepting individual’s goals and views of things, encouraging more than “taking over”.
- CHWs – 30% of encounters categorized as providing encouragement or motivation.
- Support groups.
Core Common Language and Concepts

• Examples:
  – “HbA1” vs. “blood sugars” vs “Metabolic Control”
  – “Action Plan” vs. “Problem Solving”

• Consistency
  – Avoids confusion
  – Reinforces importance – when something is important, we tend to give it a single name

• Marshall University/New River Health Association trained all staff in common self management model
Not Limited to Diabetes

- Diabetes is woven through all of life so must address the diverse concerns or challenges the individual faces
- Programs can be general – e.g., weight management, physical activity, chronic disease self management groups
- Reduce or avoid stigma by programs directed toward general public
- Gain support for program by linking to broad interests
Extend to Community Resources –
Broaden the Team

• Nonhealth partners, e.g., youth programs, housing authority, churches, beauty salons, barber shops
• Advisory boards and committees
• Culturally specific organizations, e.g., *Talking Circles* in American Indian communities
• Classes and activities for family, friends, etc.
• Community campaigns, mailings, etc.
Variety – Range of “good practices” rather than single “best practice”

• 60% to 70% of patients report not having received self-management interventions (Austin *Endo Practice*. 2006 12(Suppl 1):138-141)

• Reaching and engaging more important than efficacy
  – Intervention of 75% efficacy that reaches and engages is more beneficial than 100% efficacy that does not engage

• Use varied channels – telephone, drop-in groups, scheduled groups

• Many “good” better than few “best” practices
Community Health Workers in Ongoing Follow Up and Support
Community Health Workers

- Personal, have time, often of individual’s community
- Linkage to clinical and other resources
- Reinforce and trouble-shoot basic education
- Provide emotional support and encouragement to:
  - Encourage Healthy Coping
  - Maintain motivation
- Teach classes
- Organize for advocacy, community action
Mean Hemoglobin A1c Levels at Start, End, and 9 and 12 Months Following Promotora-Led Self Management Classes, Gateway Health Center, Laredo, Texas
Group Medical Visits
Group Medical Visits

• All patients with common characteristics, e.g., all with diabetes, CHF, arthritis, or chronic disease
• 2 – 3 hour block
• Clinical assessment and medical care
• Group discussion and support
• Educational sessions
• Group activities – exercise, cooking classes, etc.
Evaluation of Group Medical Visits

- Randomized to GMV or individual care
- 4, quarterly visits
- Clinical tests several days in advance to allow review before visit
- Individual meeting at visit prn
- Structured educational curriculum including weight loss, self management skills like food shopping, etc.
- Group discussion
At 5 years, GHb = 7.3 in GMV
9.0 in Individual Care

Trento et al., *Diab Care* 2001 24: 995-1000; 2004 27: 670-675

Medical Group Visits at New River Health Association

May 2001 - Began
- One team - Doctor, Nurse and Facilitator

June 2006 – 8 MGV teams
- Mental health (2)
- Black lung (1)
- Chronic pain -GOLS (1)
- Chronic care teams (3)
- Workers comp (1)

www.diabetesinitiative.org
Patients get more of what they need

Mechanism for referrals –

- Routine follow-up appointments are made;
- Referrals to specialists and preventive health referrals are made;
- Referrals to self management groups and community resources.
Patients are engaged

- Patients are responsible for:
  - checking their med list
  - communicating trends in their health
  - understanding their labs
  - partnering to manage their care

- Individual goal are set and documented
- Patient/provider relationship shifts to more of a partnership and patients understand their role
- Group discussion gives opportunity for patients to give and get support from each other
Maintenance and Support

• Help Yourself Support Group
  – Patients can drop in as needed;
  – Providers and nurses can refer patients that need ongoing follow-up and support;
  – Informal structure allow the agenda to be defined by the group;
  – Goal setting at end of every visit
Range of Opportunities for Contact, Assistance, Support
Open Door Health Center
Building Community Support for Diabetes Care

Program Director: Nilda Soto, MD
Project Coordinator/ Nutritionist and Lifestyle Coach: Laura Bazyler, MS, RD, LD/N

1350 SW 4th Street
Homestead, FL 33030

nsoto26@msn.com
www.opendoorhc.org
Open Door Health Center

• Free clinic for the uninsured poor; 501c3
• Adult, Women’s Health & Pediatric Care
  - 2,200 patients
  - 45,000 patient visits
  - 160 free surgeries
  - 150 volunteers
  - 200 students trained on-site
• $1.5 million in free services provided annually

Homestead, Florida
www.opendoorhc.org
Our Patients

- Mainly farmworkers in fields and packing houses
- Highest % uninsured in Dade County
- Demographics:
  - 72% Hispanic/Latino
  - 11% African American
  - 9% Haitian
  - 8% Other
“Re-energized” Patient Care

“Personal Connection”

- Weekly Diabetes Support/Group Appointments
- Quarterly Diabetes Classes
- Staff exercise with patients
- Plus, ongoing medical care
- Community Health Workers
Services “On Demand”

- Patients can “walk-in” to any program activity
- Patients have access to a variety of “team” members

- “Team” can schedule patients for additional visits as needed
“Not Limited to Diabetes”

- In-house clothing closet & food pantry
- Referrals to social service agencies
- In-house children’s homework club & youth/teen outreach ministries
- Women’s Health Program
- Referrals for “secondary & tertiary” healthcare

Nutrition Intern explaining the “Plate Method” to children from local Homework Club
OFUS on Three Levels

- Local Radio Stations
- Local CBO’s
- Churches

- Support Group/Group Appt.
  - Cooking Classes
  - Supermarket Tours
  - “Diabetes 101”
  - Adult Fitness
  - Diabetes Presentations

- Community
  - ODHC Patient Family
  - Adults with DM Type 2

ODHC: Clinic as platform for community program
Holyoke Health Center, Inc.
Advancing Diabetes Self Management

Executive Director: Jay Breines, M.D.
Project Director: Dawn Heffernan, R.N., M.S.

230 Maple Street
Holyoke, MA 0104

dawn.heffernan@hhcinc.org
www.hhcinc.org
Holyoke Health Center

- JCAHO accredited
- Federally Qualified CHC
- Western Massachusetts
- 17,277 medical patients
- 6,722 dental patients
- 162 employees
  - 25 medical providers
  - 3 dentists
  - On-site retail pharmacy
- One of the highest diabetes mortality rates in Massachusetts
- Nearly 100% of our patients live at or below the poverty level
Multiple Interventions provides ample opportunity for ongoing follow up and support

- Breakfast Club
- Chronic Disease Self-Management Classes
- Community Health Workers
- Diabetes Education Classes
- Exercise Classes
- Individual Appointments with the diabetes educator and the nutritionist
- Snack Club
Community Health Workers

- Bridge between the community and the health center
- Co-lead Programs
- Outreach
- Teaching
- Social Support
- Telephone Follow-Up
- Joint Visits with Providers
- Goal Setting/Problem Solving
- Collaboration with the nurses and providers in the clinic
Nurse and Community Health Worker Collaboration

- Follow up and support for patients not seen by their provider in the last 4 months
- Registry report generated every month
- Patients identified
- Nurses call patients, send letters and then refer to the community health workers
- Community health workers reattempt phone contact, letter and then provide a home visit to patients address
Exercise Class
Breakfast Club

• Eleven Sessions
• Nutritious Breakfast
• Correct Portion Sizes
• Balanced Meals
• Variety of Foods
• New food products introduced
• Label reading
• Hands on learning opportunities
• Incentives and raffles
Supermarket Tour

- Practice skills learned in class
- Patients with low literacy levels benefit
- Assess patient knowledge of products and food selection
- Hands on learning
Drop In Snack Club

- Informal gatherings
- Meet Program Staff
- Diabetes Bingo
- Raffles with healthy prizes
- Goal Setting
- Problem Solving
- Referral to other programs

On-Demand -- Staff Initiated
A Critical Continuum

- Snack Drop-In
- Breakfast Club
- Talking Circle Support Group
- Self Management Class
- Group Medical Visit
- RN/CHW Monitoring

On-demand, Varied Contacts to Suit Individual Preferences

Staff-Initiated Contacts to Maintain Contact and Prompt Engagement
Culture Shift??

- Personal connection with staff
- On demand (as well as staff initiated)
- Variety of alternatives for individual preferences
- Motivational
- Common language and concepts
- Not limited to diabetes – person-centered
- Monitors needs and promotes access
- Extends to community, neighborhood, family

Program culture that makes central the role, needs, and preferences of the individual in self management
• Special Issue of *The Diabetes Educator*: 
*Promising Approaches to Diabetes Self Management: Lessons from the Diabetes Initiative of the Robert Wood Johnson Foundation*  
Due in Late June/Early July

• Fisher, Brownson, O’Toole & Anwuri:
